

# KNIFESTYLES OF THE RICH & FAMOUS

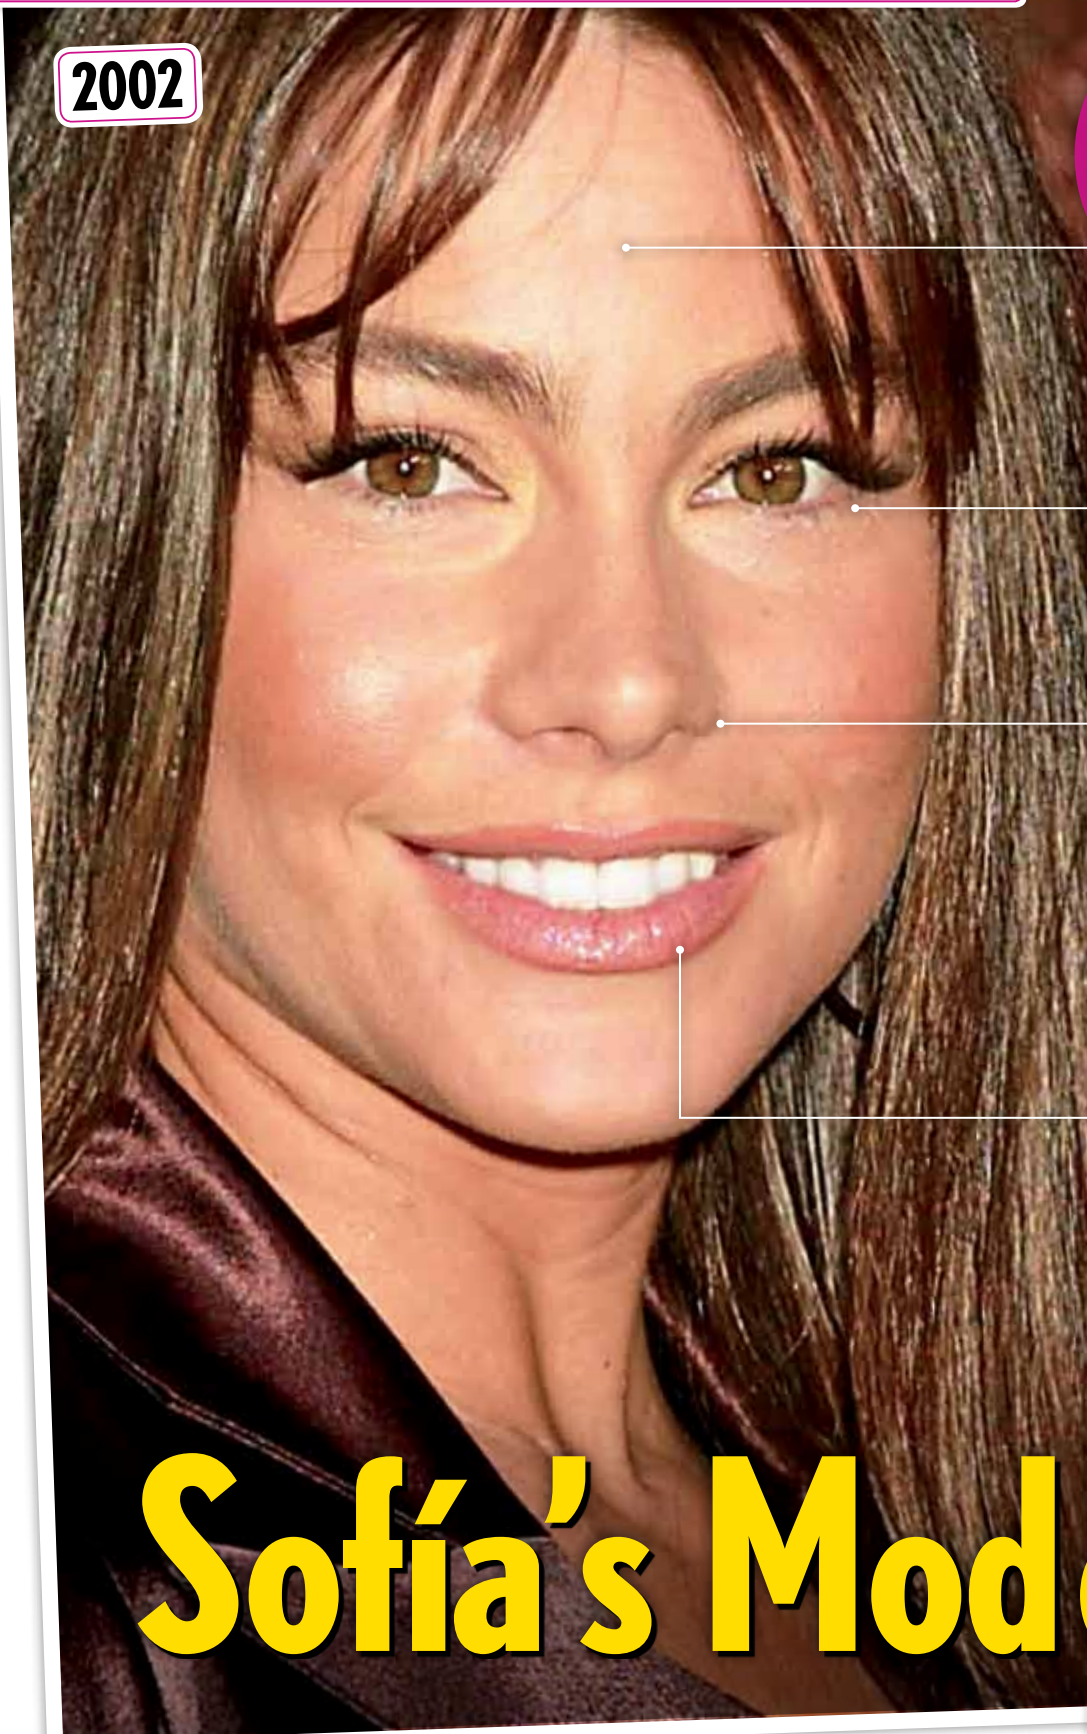

**S**ofia Vergara is a natural-born beauty, and the *Modern Family* star is still every bit the bombshell at 44. But is it all in the genes? Experts tell *Life & Style* they suspect Sofia is making subtle cosmetic changes to her famous face. She can certainly afford the best in the industry; Sofia earned \$43 million in 2016, making her the world's highest-paid TV actress. "Sofia is taking the conservative approach to antiaging," says Dr. Norman Rowe, who does not treat the Colombian stunner. He points to laser resurfacing to improve the

**"She's had tasteful procedures."**

quality of her skin, an eyelid lift to open her eyes and Botox to smooth out the brow and eye area. Dermatologist Dr. Kally Papantoniou, also not Sofia's doc, praises her look as "very natural," citing a minimal combination of Botox, fillers and a noninvasive procedure like Ulthera, which lifts and tightens the skin. When asked how she feels about plastic surgery and Botox, the mom of one is coy: "If it makes you happier and more confident," responds Sofia, "why not?" **LS**

2002

**FOREHEAD**  
"Her forehead has likely been treated with Botox," Dr. Kally Papantoniou says of the star's line-free appearance. Cost? \$800 every three months for injections.

**EYES**  
Dr. Norman Rowe suspects the actress has had an eyelid lift and a brow lift because the heavy folds over her eyes are now gone. Eyelid lift: \$6K. Brow lift: \$4K.

**NOSE**  
The tip of Sofia's nose looks "elevated and sharper," which suggests a nose job, says plastic surgeon Dr. Steve Fallek (who does not treat the star). Cost of rhinoplasty: \$8K.

**LIPS**  
Sofia's plumper smile could indicate filler, says Dr. John Zannis (not her doc). "Note the fuller upper lip and cupid's-bow area," he says. Price tag? \$650 to \$800 once a year.
